6. University of Illinois–Urbana-Champaign
7. Oklahoma State University

Graduate programs at 278 schools granting doctoral degrees were surveyed. Of those, 241 responded; 238 provided the data needed to calculate rankings based on a weighted average of the 11 quality measures described here.

Quality assessment (weighted

by .40): Two surveys were conducted in the fall of 2008. Education school deans and deans of graduate studies were asked to rate program quality from “marginal” (1) to “outstanding” (5). Forty-seven percent responded. The resulting score is weighted by .25. School superintendents nationwide in a sampling of districts were also asked to rate programs. Twenty-three percent responded. The two most recent superintendents’ surveys were averaged and are weighted by .15.

Student selectivity (.18): This combines mean verbal and quantitative GRE scores of doctoral students entering in fall 2008 and the acceptance rate of doctoral applicants for the 2008–2009 academic year (.06 each). Where mean GRE scores are not available for doctoral students, mean GRE scores for all entering students may be substituted, if available.

Faculty resources (.12): Resources include the 2008 ratio of all full-time-equivalent doctoral students to full-time faculty (.045); the average percentage of full-time faculty holding awards or editorships among selected education journals in the past two years (.025); and the ratio of doctoral degrees granted to full-time faculty in the past school year (.05).

Research activity (.30): This measure uses average total education school research expenditures (.15) and the average research expenditures per full-time faculty member (.15). Expenditures refer to separately funded research, public and private, conducted by the school, averaged over fiscal years 2007 and 2008.

Overall rank: Data were standardized about their means, and standardized scores were weighted, totaled, and rescaled so that the top school received 100; other schools received their percentage of the top score.

Specialty rankings: These specialty ratings are based solely on nominations by education school deans and deans of graduate studies. They were asked to choose up to 10 top programs noted for excellence in each specialty area. Those with the most votes are listed.

Teacher Preparation at the Top Education Schools

Below, you'll find key information about teacher-prep programs at the top 50 *U.S. News* education schools, listed alphabetically. This table is not a ranking of these programs. Key attributes to consider when choosing a program

include how many instructors are engaged in teacher prep, whether students intern in a professional development school that is closely tied to the university, and whether peer working groups are organized for student teachers.

School	Nationally accredited ¹	Type of education school: undergrad/grad	'08 enrollment in graduate teaching programs	Alternative route to licensure program	Students trained in professional development school	Students assigned to peer working groups	'08 full-time faculty engaged in teaching programs	Preparation offered for national certification
